

Process of Accessing Live Activities and Events Through Internet

Abstract of the Disclosure

A process of accessing live activities and events through Internet includes the steps of: capturing at least a live action event having at least one participant carrying at least a video camera supported on an eye level position of the participant for capturing the live action event from a point of view of the participant; uploading the live action event to a central control site through Internet; and broadcasting the live action event to a subscriber via the central control site through Internet. Therefore, each subscriber is able to view the live action event from the participant's point of view as the subscriber is virtually participating.
